

Social Agreement

I have met with all our teachers and staff about returning to in person school. I need to share with families that our teachers are committed to safely teaching and caring for students this year. Some of the things **teachers do** in order to maintain safety for themselves and our NBS families are:

- Avoiding unnecessary risks, such as large gatherings where people are unable to maintain 6 ft distance and limiting or being very cautious when traveling and shopping
- Wearing masks when inside any public space or when in the same room as other people, even at NBS
- Working from home when possible
- Limiting contact with any people outside of their own immediate family and close friend circles who are agreeing to maintain safe practices and bubble together.
- Maintaining 6 feet distance from people who are not in their social bubbles.
- Frequently washing hands and avoiding touching masks and faces

Our staff understand that our work carries risk. **We are asking families to share the work of keeping our school safe.** We ask that families also follow the risk mitigation practices, listed above. Additionally, this includes:

- Adhering to the governor's stated [guidelines for mask-wearing](#), social distancing, and other safety protocols
- Keeping children home if there is any reason to think that they or other family members are **presenting with any COVID-19 symptoms or have any possible exposure to COVID19**
- Keeping children home if there has been any known contact with persons who are currently positive for this illness
- Keeping open communication with teachers and staff at the school about any symptoms of illness or possible COVID-19 exposure, so that we can all work together to monitor and limit the spread of illness in our school family
- Getting tested **or** quarantining yourself if you are exposed to COVID-19 or have any reason to believe you have been exposed before sending your child(ren) back to school. **Your risk immediately becomes our risk** if you are exposed to COVID-19.

To make this work we must all keep each other in mind when making decisions. We absolutely know how important it is for students to be at school. In order to do so, we need to trust in each other to keep safe.

Please discuss this agreement with your family, print names and sign below, and return this to Autum to indicate your understanding and compliance with these conditions.
